

MAIN SETTINGS

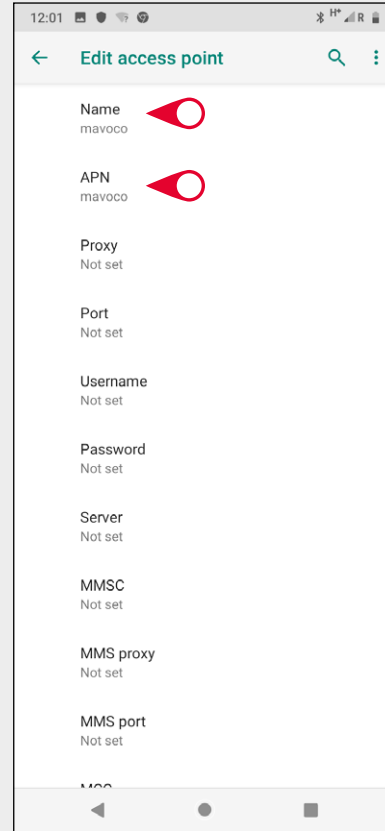

1. Go to: Settings - Network & Internet - Mobile Network

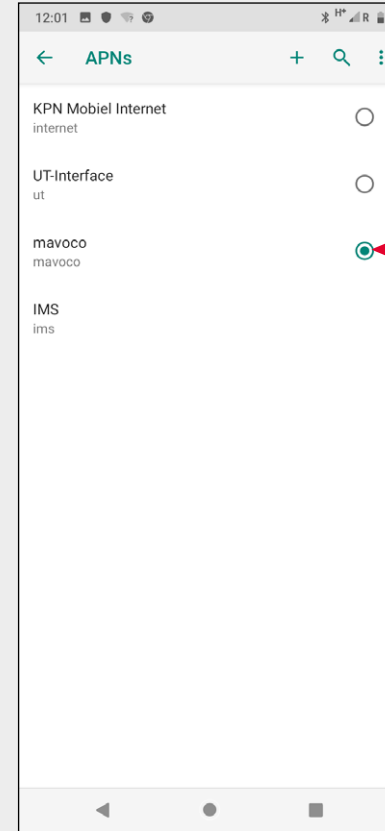

Push Advanced to open full menu. Make sure that all settings match above.

Then push Access Point Names / APN

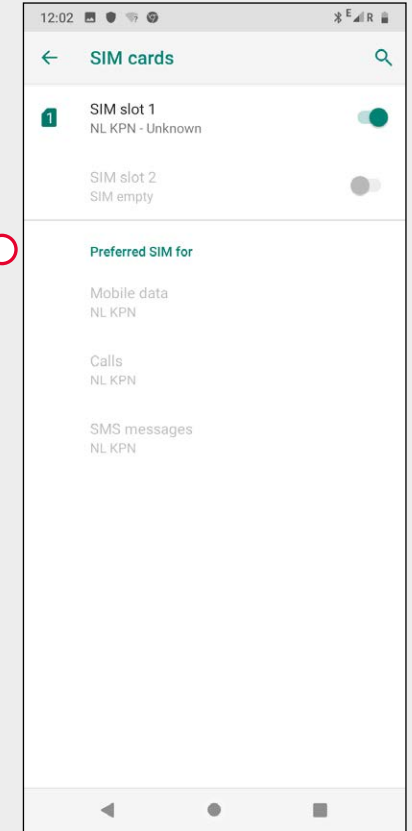

2. Then tap the '+' symbol. You can then type in 'mavoco'. I put it in for both name and APN.

3. Tap the 3 dots in the top right corner and **hit save.**

4. Make sure SIM is selected.

5. Go back to Network & Internet and check SIM should now work.

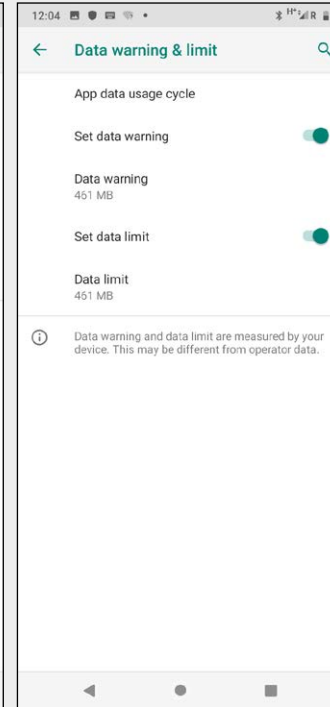

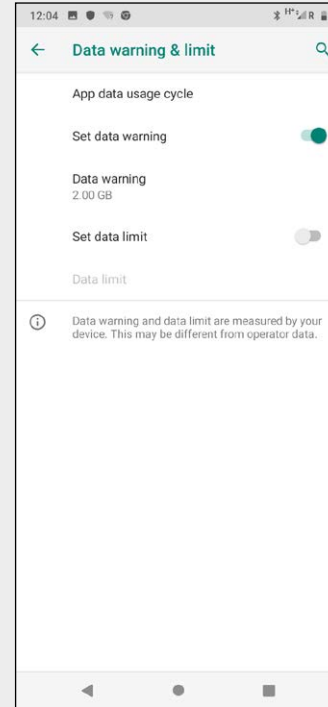

EXTRA SETTINGS

1. Go to: Settings - Network & Internet - Data usage

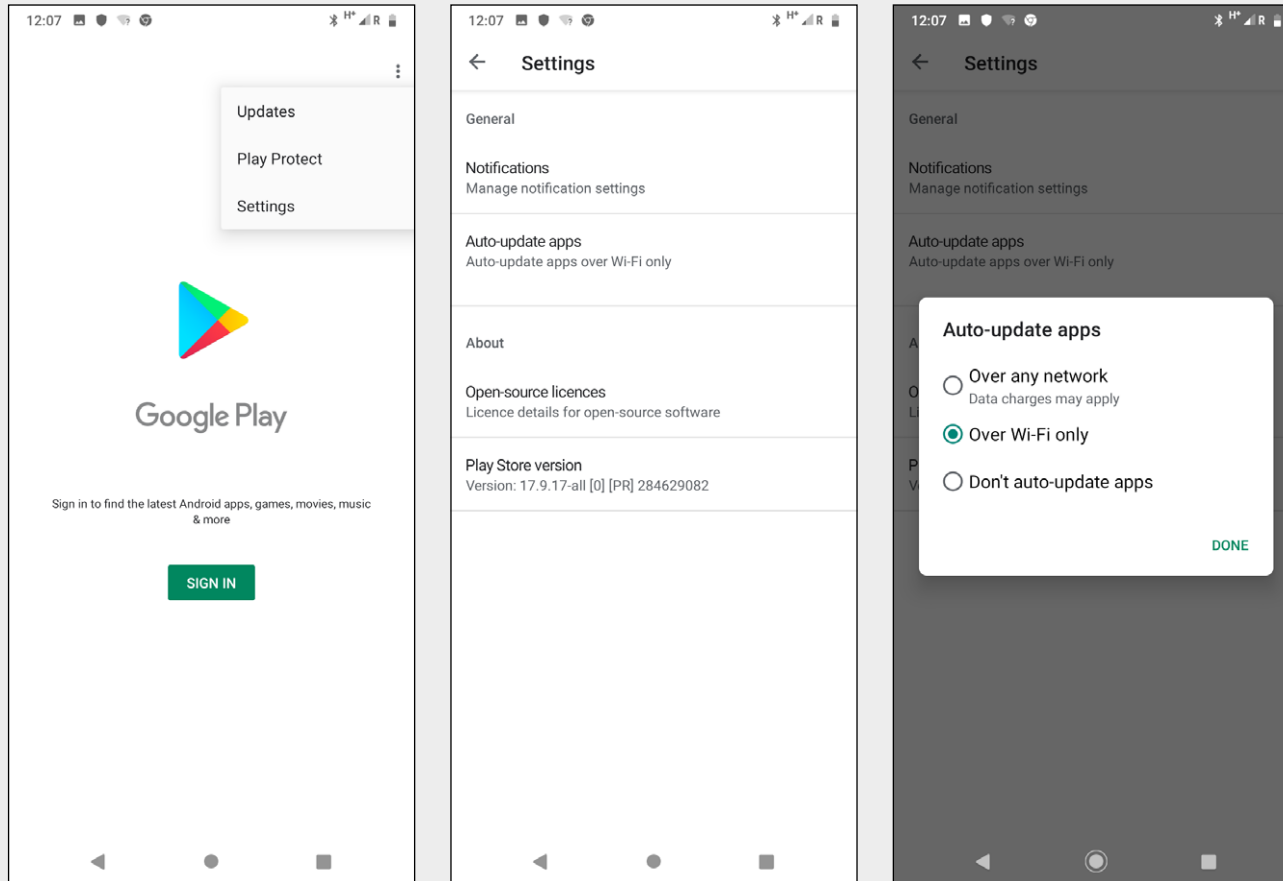

2. Make sure that **Mobile data** is checked

EXTRA: It would also be good practice to set a data limit warning here. Usually set slightly below the amount agreed with carrier.

OPTIONAL SETTINGS

To make sure that data is not being used by updates, open the Google Play app.

You do not need to log in. Tap 3 dots in top right hand corner and then 'settings'.

You can then choose to either on update with wifi or remove auto- updates altogether.
